# Introducing PHARMAC

PHARMAC, the Pharmaceutical Management Agency, is a Crown entity established pursuant to the New Zealand Public Health and Disability Act 2000 (the Act). The primary objective of PHARMAC is to secure for eligible people in need of pharmaceuticals, the best health outcomes that are reasonably achievable from pharmaceutical treatment and from within the amount of funding provided.

The PHARMAC Board consists of up to six members appointed by the Minister of Health. All decisions relating to PHARMAC's operation are made by or under the authority of the Board. In particular, Board members decide on the strategic direction of PHARMAC and may decide which community pharmaceuticals should be subsidised and at what levels, and determine national prices for some pharmaceuticals to be purchased by and used in DHB Hospitals, and whether or not special conditions are to be applied to such purchases.

## Members of the PHARMAC Board

Richard Waddel

Gregor Coster

Kura Denness

David Kerr

David Moore

Adrienne von Tunzelmann

Decisions taken by the PHARMAC Board members, or made under the authority of the Board, incorporate a balanced view of the needs of prescribers and patients. The aim is to achieve long-term gains and efficient ways of making pharmaceuticals available to the community and for DHB Hospitals to purchase them.

The functions of PHARMAC are to perform the following, within the amount of funding provided to it in the Pharmaceutical Budget or to DHBs from their own budgets for the use of pharmaceuticals in their hospitals, as applicable, and in accordance with its annual plan and any directions given by the Minister (Section 103 of the Crown Entities Act):

- a) to maintain and manage a pharmaceutical schedule that applies consistently throughout New Zealand, including determining eligibility and criteria for the provision of subsidies;
- b) to manage incidental matters arising out of (a), including in exceptional circumstances providing for subsidies for the supply of pharmaceuticals not on the pharmaceutical schedule;
- c) to engage as it sees fit, but within its operational budget, in research to meet its objectives as set out in Section 47(a) of the Act;
- d) to promote the responsible use of pharmaceuticals;
- e) to manage the purchasing of any or all pharmaceuticals, whether used either in a hospital or outside it, on behalf of DHBs;
- f) any other functions given to PHARMAC by or under any enactment or authorised by the Minister.

The policies and criteria set out in the Pharmaceutical Schedule and PHARMAC's Operating Policies and Procedures arise out of, and are designed to help PHARMAC achieve and perform, PHARMAC's objective and functions under the Act.

However PHARMAC may, having regard to its public law obligations, depart from the strict application of those policies and criteria in certain exceptional cases where it considers this necessary or appropriate in the proper exercise of its statutory discretion and to give effect to its objective and functions, particularly with respect to:

- Determining eligibility and criteria for the provision of subsidies; and
- In exceptional circumstances providing for subsidies for the supply of pharmaceuticals not on the Pharmaceutical Schedule.

## Decision Criteria

PHARMAC updates the Pharmaceutical Schedule at regular intervals to notify prescribers, pharmacists, hospital managers and patients of changes to Community Pharmaceutical subsidies and the prices for Hospital Pharmaceuticals. In making decisions about amendments to the Pharmaceutical Schedule, PHARMAC is guided by its Operating Policies and Procedures, as amended or supplemented from time to time. The criteria for decisions about proposed amendments to the schedule are:

- (a) the health needs of all eligible people within New Zealand;
- (b) the particular health needs of Maori and Pacific peoples;
- (c) the availability and suitability of existing medicines, therapeutic medical devices and related products and related things;
- (d) the clinical benefits and risks of pharmaceuticals;
- (e) the cost-effectiveness of meeting health needs by funding pharmaceuticals rather than using other publicly funded health and disability support services;
- (f) the budgetary impact (in terms of the pharmaceutical budget and the Government's overall health budget) of any changes to the Schedule;
- (g) the direct cost to health service users;
- (h) the Government's priorities for health funding, as set out in any objectives notified by the Crown to PHARMAC, or in PHARMAC's Funding Agreement, or elsewhere; and
- (i) such other criteria as PHARMAC thinks fit. PHARMAC will carry out appropriate consultation when it intends to take any such "other criteria" into account.

The Operating Policies and Procedures, including any supplements, also describe the way in which PHARMAC determines the level of subsidy or purchase price payable for each Community Pharmaceutical or Hospital Pharmaceutical, respectively.

Copies of PHARMAC's Operating Policies and Procedures and of any applicable supplements are available on the PHARMAC website, or on request.

## PHARMAC and Section H of the Pharmaceutical Schedule

PHARMAC manages the national Pharmaceutical Schedule, which lists:

- Pharmaceuticals available in the community and subsidised by the Government with funding from the Pharmaceutical Budget; and
- some Pharmaceuticals purchased by DHBs for use in their hospitals, and includes those Hospital Pharmaceuticals for which national prices have been negotiated by PHARMAC.

In the community approximately 1848 Pharmaceuticals are subsidised by the Government. Most are available to all eligible people within New Zealand on prescription by a medical doctor. Some are listed with guidelines or conditions such as 'only if prescribed for a dialysis patient' or 'Special Authority – Retail Pharmacy', to ensure that Pharmaceuticals are used by those people who are most likely to benefit from them. Pharmaceuticals provided to patients for use while in DHB Hospitals are not covered by Sections A to G of the Pharmaceutical Schedule.

Section H of the Pharmaceutical Schedule includes Pharmaceuticals that can be purchased at a national price by DHBs for use in their hospitals. These are referred to as National Contract Pharmaceuticals.

Section H of the Pharmaceutical Schedule also identifies Pharmaceutical Cancer Treatments that DHBs have been directed to fund for use in their hospitals and/or in association with services provided in their hospitals, as well as new Pharmaceuticals used in hospitals, which have been or are being assessed by PHARMAC, the results of that analysis being available to DHB Hospitals via PHARMAC's website.

A list of Discretionary Community Supply Pharmaceuticals, in Section H of the Pharmaceutical Schedule identifies those products that currently are not subsidised from the Pharmaceutical Budget as Community Pharmaceuticals in Sections A to G of the Pharmaceutical Schedule but which DHBs can at their discretion fund for use in the community from their own budgets without specific Hospital Exceptional Circumstances approval.

### The PHARMAC Hospital Team

Steffan Crausaz	Manager, Funding and Procurement
Andrew Davies	Procurement Initiatives Manager
Rachel Grocott	Health Economist/Team Leader, Assessment
Rachel Pratt	Hospital Exceptional Circumstances Panel Co-ordinator

## PHARMAC's clinical advisors

### Pharmacology and Therapeutics Advisory Committee (PTAC)

PHARMAC works closely with the Pharmacology and Therapeutics Advisory Committee (PTAC), an expert medical committee which provides independent advice to PHARMAC on health needs and the clinical benefits of particular pharmaceuticals for use in the community and/or in DHB Hospitals.

The committee members are all senior, practising clinicians. The chair of PTAC sits with the PHARMAC Board in an advisory capacity.

PTAC helps decide which community pharmaceuticals are to be subsidised from public monies by making recommendations to PHARMAC. Part of the role of PTAC is to review whether community pharmaceuticals already listed on the Schedule should continue to receive Government funds. The resources freed up can be used to subsidise other community pharmaceuticals with a greater therapeutic worth.

PHARMAC may obtain clinical advice from PTAC in relation to national purchasing strategies for Hospital Pharmaceuticals. There may be additional specialist hospital representatives on PTAC subcommittees, or additional PTAC subcommittees, where PHARMAC considers this necessary.

#### PTAC members are:

Carl Burgess	MBChB, MD, MRCP (UK), FRACP, FRCP, physician/clinical pharmacologist, Chair
Ian Hosford	MBChB, FRANZCP, psychiatrist
Sisira Jayathissa	MBBS, MD, MRCP, FAFPHM, FRCP, FRACP, physician
Peter Jones	BMedSci, MBChB, PhD, FRCP, FRACP, physician
Jim Lello	BHB, MBChB, DCH, FRNZCGP, general practitioner
Graham Mills	MBChB, MTropHith, MD, FRACP, infectious diseases specialist and general physician
Peter Pillans	MBBCh, MD, FCP, FRACP, clinical pharmacologist
Paul Tomlinson	MBChB, MD, MRCP, FRACP, BSc, paediatrician, Deputy Chair
Howard Wilson	BSc, PhD, MB, BS, Dip Obst, FRNZCGP, general practitioner
<i>Contact PTAC C/-</i>	<i>Advisory Committee Manager Pharmaceutical Management Agency PO Box 10 254, WELLINGTON PTAC@pharmac.govt.nz</i>

### Hospital Pharmaceuticals Advisory Committee (HPAC)

The Hospital Pharmaceutical Advisory Committee (HPAC) is a committee made up of representatives from DHBs, as nominated by DHBs and appointed by the PHARMAC Board. As part of the National Hospital Pharmaceutical Strategy Review in late 2004 a decision was made to seek new nominations for HPAC. The PHARMAC Board has appointed the following members to HPAC:

Neil Aitcheson	Materials Manager	MidCentral
Paul Barrett	Pharmacy Services Manager	Canterbury
Sarah Fitt	Pharmacy Manager	Auckland
Jan Goddard	Pharmacy Services	Waikato
Lesley Hawke	Service Manager of Pharmacy	Counties Manukau
David Ryan	Pharmacy Operations Manager	Waitemata
Simon Donlevy	Pharmacy Manager	Southland
Chris Morgan	Materials Manager	Auckland

*Contact HPAC C/- Manager, Funding and Procurements

PO Box 10 254, WELLINGTON*

# Purpose of the Pharmaceutical Schedule

The purpose of the Schedule is to list:

- the Community Pharmaceuticals that are subsidised by the Government and to show the amount of the subsidy paid to contractors, as well as the manufacturer's price and any access conditions that may apply; and
- some Hospital Pharmaceuticals that are purchased and used by DHB Hospitals, including those for which national prices have been negotiated by PHARMAC.

The purpose of the Schedule is not to show the final cost to Government of subsidising each Community Pharmaceutical or to DHBs in purchasing each Hospital Pharmaceutical since that will depend on any rebate and other arrangements PHARMAC has with the supplier and, for some Hospital Pharmaceuticals, on any logistics arrangements put in place by individual DHB Hospitals.

## Finding Information in the Pharmaceutical Schedule

### Community Pharmaceuticals

For Community Pharmaceuticals, the Schedule is organised in a way to help the reader find Community Pharmaceuticals, which may be used to treat similar conditions. To do this, Community Pharmaceuticals are first classified anatomically, originally based on the Anatomical Therapeutic Chemical (ATC) system, and then further classified under section headings structured for the New Zealand medical system.

- Section **A** lists the General Rules in relation to Community Pharmaceuticals and related products.
- Section **B** lists Community Pharmaceuticals and related products by anatomical classification, which are further divided into one or more therapeutic headings. Community Pharmaceuticals used to treat similar conditions are grouped together.
- Section **C** lists the rules in relation to Extemporaneously Compounded Products (ECPs) and Community Pharmaceuticals that will be subsidised when extemporaneously compounded.
- Section **D** lists the rules in relation to Special Foods and the Special Foods that are subsidised.
- Section **E** Part I lists the Community Pharmaceuticals that are subsidised on a Practitioner's Supply Order (PSO) and Wholesale Supply Order (WSO).
- Section **E** Part II lists remote areas for the purpose of PSOs.
- Section **F** lists the Community Pharmaceutical dispensing period exemptions.
- Section **G** lists the Community Pharmaceuticals eligible for reimbursement of safety cap and related rules.

The listings are displayed alphabetically (where practical) within each level of the classification system. Each anatomical section contains a series of therapeutic headings, some of which may contain a further classification level. Where a Community Pharmaceutical is used in more than one therapeutic area, they may be cross-referenced.

The therapeutic headings in the Pharmaceutical Schedule do not necessarily correspond to the therapeutic groups and therapeutic subgroups, which PHARMAC establishes for the separate purpose of determining the level of subsidy to be paid for each Community Pharmaceutical.

The index located at the back of the book in which Sections A–G of the Pharmaceutical Schedule are published can be used to find page numbers for generic chemical entities, or product brand names.

### Hospital Pharmaceuticals

- Section **H** lists Pharmaceuticals that DHBs fund from their own budgets. The Hospital Pharmaceuticals are grouped into the following Parts in Section H:
  - Part I lists the rules in relation to Hospital Pharmaceuticals.
  - Part II lists Hospital Pharmaceuticals for which national contracts exist (National Contract Pharmaceuticals). These are listed alphabetically by generic chemical entity name and line item, the relevant Price negotiated by PHARMAC and, if applicable, an indication of whether it has Hospital Supply Status (HSS) and any associated Discretionary Variance (DV) Pharmaceuticals and DV Limit.
  - Part III lists Assessed Pharmaceuticals, which have been or are being assessed by PHARMAC and, where such assessment is available, PHARMAC's opinion regarding the use of the Assessed Pharmaceuticals in hospitals. DHB Hospitals are not obliged to implement those recommendations.
  - Part IV lists Discretionary Community Supply Pharmaceuticals, which are not Community Pharmaceuticals, but which a DHB Hospital can, in its discretion, fund for use in the community from its own budget.

The index located at the back of Section H can be used to find page numbers for generic chemical entities, or product brand names, for Hospital Pharmaceuticals.

### Explaining hospital pharmaceutical entries

Section H of the Pharmaceutical Schedule lists National Contract Pharmaceuticals, DV Pharmaceuticals, Assessed Pharmaceuticals and Discretionary Community Supply Pharmaceuticals that are available to be purchased by DHBs. Where applicable, the listing of the Hospital Pharmaceutical may have an indication of whether it has HSS (if the brand name is in **bold**), its Price and any associated DV Pharmaceuticals and DV Limit.

<b>Contracted Pharmaceutical Description</b>	<b>Brand (ex man. excl. GST)</b>	<b>Price(\$)</b>	<b>Per</b>	<b>DV Limit</b>	<b>DV Limit applies from</b>	<b>DV Pharmaceuticals</b>
CEFACLOR MONOHYDRATE Cap 250 mg .....	<b>Ranbaxy-Cefaclor</b>	28.90	100	1%	Sept-07	Clorotir
RITUXIMAB Inj 500 mg per 50 ml vial .....	<b>Mabthera</b>	2987.00	1	5%	Apr-06	(B)
RITONAVIR Cap 100 mg .....	Norvir	121.87	84			

In the case of cefaclor monohydrate, Ranbaxy-Cefaclor is the Pharmaceutical with HSS. While the price indicated applies from the date on which Ranbaxy-Cefaclor cap 250 mg is listed, it does not have HSS until 1 September 2007. The 1% DV Limit means that at least 99% of the total volume of all brands of cefaclor monohydrate caps 250 mg purchased by DHB Hospitals from 1 September 2007 must be Ranbaxy-Cefaclor. Subject to the provisions of 4.2(c)(iii) of the General Rules for Hospital Pharmaceuticals, DHB Hospitals may only purchase up to 1% of other brands of cefaclor monohydrate caps 250 mg. Those other brands of cefaclor monohydrate caps 250 mg known to be available in New Zealand are listed as DV Pharmaceuticals but the 1% DV Limit also applies to any unlisted brands of cefaclor monohydrate caps 250 mg.

The 5% DV Limit applying to rituximab inj 500mg per 50 ml has a similar effect as the 1% DV Limit in the cefaclor monohydrate example in that at least 95% of the total volume of all rituximab inj 500 mg per 50 ml purchased must be Mabthera. There are no other known brands of rituximab inj 500 mg per 50 ml available in New Zealand but the (B) noted under DV Pharmaceuticals indicates that DHB Hospitals are prohibited from purchasing any brands of 500 mg per 50 ml rituximab in the same or similar form distributed in New Zealand.

The brand of ritonavir 100 mg capsules contracted for, Norvir, does not have HSS or any DV Limit or DV Pharmaceuticals. Accordingly, DHB Hospitals are able to buy the Norvir brand of ritonavir 100 mg capsule at the listed Price if they choose but are not prohibited from buying any other brand of the Pharmaceutical in any quantities required.

## **Hospital Pharmaceutical and Pharmaceutical Cancer Treatment Costs**

The cost of purchasing Hospital Pharmaceuticals and Pharmaceutical Cancer Treatments (for use in DHB hospitals and/or in association with Outpatient services provided in DHB Hospitals) is met by the Funder (in particular, the relevant DHB) from its own budget. As required by section 23(7) of the Act, in performing any of their functions in relation to the supply of Pharmaceuticals, including Pharmaceutical Cancer Treatments, DHBs must not act inconsistently with the Pharmaceutical Schedule.

## **PHARMAC website**

Information about PHARMAC is available on its website at <http://www.pharmac.govt.nz>. The website includes copies of the Annual Review, Annual Report and Annual Plan, as well as information such as the Pharmaceutical Schedule, Pharmaceutical Schedule Updates, other publications and recent press releases.

Copies of the February 2002 *National Hospital Pharmaceutical Strategy* can be found on the website.

Also, for more details to that contained in Part III of Section H of the Pharmaceutical Schedule about hospital pharmaceuticals that have been assessed by PHARMAC and further information about assessments undertaken by DHB Hospitals, please refer to <http://www.pharmac.govt.nz/hpad>

## **Exceptional Circumstances policies**

The purposes of the Exceptional Circumstances policies are to provide:

- funding from the Community Exceptional Circumstances budget for medication, to be used in the community, in circumstances where the provision of a funded community medication is appropriate, but funding from the Pharmaceutical Budget is not able to be provided through the Pharmaceutical Schedule (“Community Exceptional Circumstances”); or
- an assessment process for DHB Hospitals to determine whether they can fund medication, to be used in the community, in circumstances where the medication is neither a Community Pharmaceutical nor a Discretionary Community Supply Pharmaceutical and where the patient does not meet the criteria for Community Exceptional Circumstances (“Hospital Exceptional Circumstances”); or
- an assessment process for DHB Hospitals to determine whether they can fund pharmaceuticals for the treatment of cancer in their DHB Hospital, or in association with Outpatient services provided in their DHB Hospital, in circumstances where the pharmaceutical is not identified as a Pharmaceutical Cancer Treatment (“Cancer Exceptional Circumstances”) in Sections A-H of the Pharmaceutical Schedule.

Upon receipt of an application for approval for Community Exceptional Circumstances or Hospital Exceptional Circumstances, the Exceptional Circumstances Panel first decides whether an application will be assessed initially under the Community Exceptional Circumstances criteria or the Hospital Exceptional Circumstances criteria. Cancer Exceptional Circumstances is a separate process.

## **Hospital Exceptional Circumstances (HEC)**

If the application is first assessed but not approved under the Community Exceptional Circumstances criteria, the Exceptional Circumstances Panel may recommend the funding of the pharmaceutical for use in the community by a specific patient from a DHB Hospital's own budget under Hospital Exceptional Circumstances.

If the application is first assessed under the Hospital Exceptional Circumstances criteria, the Exceptional Circumstances Panel may:

- a) recommend against the funding of the pharmaceutical for use in the community by a specific patient from a DHB Hospital's own budget, in which case a DHB Hospital must not fund the pharmaceutical from its own budget;
- b) recommend the funding of the pharmaceutical for use in the community by a specific patient from a DHB Hospital's own budget under Hospital Exceptional Circumstances, in which case a DHB Hospital may, but is not obliged to, fund the pharmaceutical from its own budget;
- c) defer its decision until further assessment under the Community Exceptional Circumstances criteria can be undertaken; or
- d) recommend interim funding of the pharmaceutical for use in the community by a specific patient from a DHB Hospital's own budget under Hospital Exceptional Circumstances until further assessment under the Community Exceptional Circumstances criteria can be undertaken.

Permission to fund a pharmaceutical for use in the community by a specific patient from a DHB Hospital's own budget under Hospital Exceptional Circumstances will only be granted by PHARMAC where it has been demonstrated that such funding is cost-effective for the relevant DHB in the region in which the patient resides.

If the patient being treated with a pharmaceutical under Hospital Exceptional Circumstances usually resides in a district other than that within the jurisdiction of the DHB initiating the treatment, then the DHB initiating the treatment must either agree to fund any on-going treatment required once the patient has returned to his/her usual DHB, or obtain written consent from the DHB or DHBs in which the patient will reside following the commencement of treatment.

## **Community Exceptional Circumstances (CEC)**

In order to qualify for Community Exceptional Circumstances approval one of the following entry criteria must be met:

- a) the condition must be rare; or
- b) the reaction to alternative funded treatment must be unusual; or
- c) an unusual combination of circumstances applies.

Rare and unusual are considered to be in the order of less than 10 people nationally.

Where one of the above Community Exceptional Circumstances entry criteria is met, the application may then be further examined under supplementary criteria, assessing suitability of the pharmaceutical, clinical benefit, the cost effectiveness of the treatment, and the patient's ability to pay for the treatment. Where these documented criteria are met, a subsidy sufficient to fully fund the pharmaceutical will be made available to the specific patient on whose behalf the application was made.

Community Exceptional Circumstances funding is only available where the criteria are met and is not available for financial reasons alone.

## Cancer Exceptional Circumstances (CaEC)

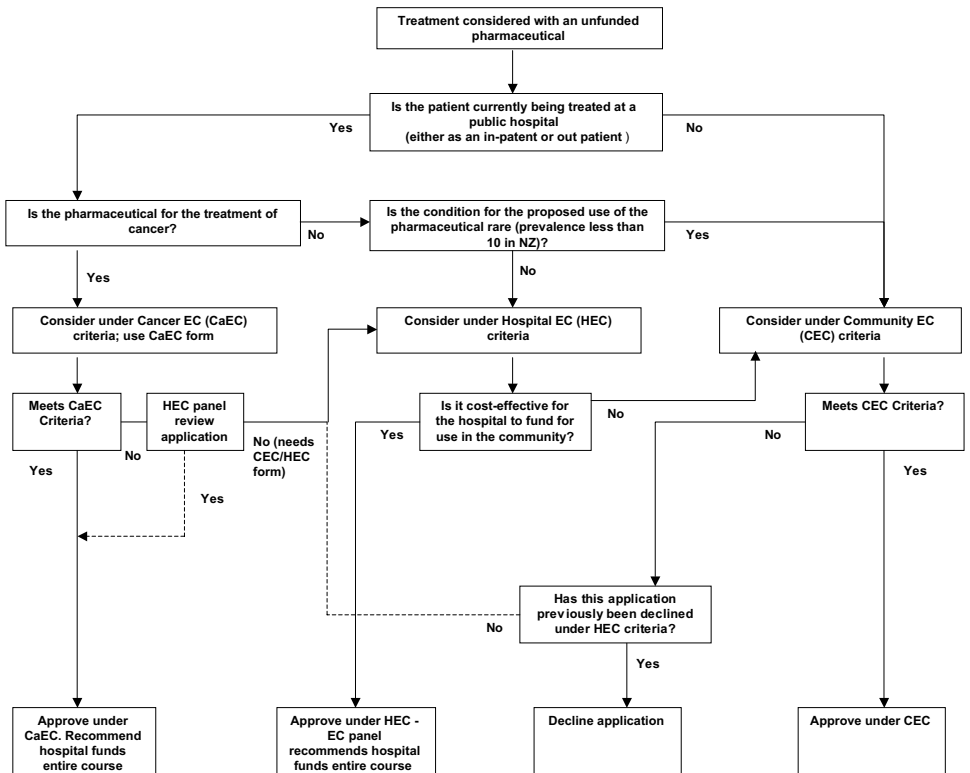

Permission to fund a pharmaceutical for the treatment of cancer from the Hospital's own budget under Cancer Exceptional Circumstances will only be granted by PHARMAC where it has been demonstrated that the proposed use meets the criteria.

If the patient being treated with a pharmaceutical under Cancer Exceptional Circumstances usually resides in a district other than that within the jurisdiction of the DHB initiating the treatment, then the DHB initiating the treatment must either agree to fund any on-going treatment required once the patient has returned to his/her usual DHB, or obtain written consent from the DHB or DHBs in which the patient will reside following the commencement of treatment.

Applications for Community Exceptional Circumstances, Hospital Exceptional Circumstances and Cancer Exceptional Circumstances should be made on the standard application form available from the PHARMAC website [www.pharmac.govt.nz](http://www.pharmac.govt.nz) or the address below:

# Part I – General Rules for Hospital Pharmaceuticals

## Introduction

Section H contains general rules that apply, and other information relating, to Hospital Pharmaceuticals.

The amounts payable by a DHB to the relevant pharmaceutical supplier are based on the contractual arrangements between PHARMAC and the relevant pharmaceutical supplier for a national price for that National Contract Pharmaceutical.

The Pharmaceutical Schedule shows the national price at which the National Contract Pharmaceutical can be purchased by DHBs, providers of logistics services, wholesalers or other such distributors, or Contract Manufacturers directly from the pharmaceutical supplier. As required by section 23(7) of the Act, in performing any of its functions in relation to the supply of Pharmaceuticals, DHBs must not act inconsistently with the Schedule.

## 1. Interpretation and Definitions

1.1 In this Schedule, unless the context otherwise requires:

“**Act**” means the New Zealand Public Health and Disability Act 2000.

“**Assessed Pharmaceuticals**” means the list of Pharmaceuticals set out in Section H Part III of the Schedule, that have been or are being assessed by PHARMAC.

“**Cancer Exceptional Circumstances**” means the policies and criteria administered by PHARMAC relating to the ability to fund, from a DHB hospital’s own budget, pharmaceuticals for the treatment of cancer that are not identified as Pharmaceutical Cancer Treatments in Sections A-H of the Pharmaceutical Schedule.

“**Community Exceptional Circumstances**” means the policies and criteria administered by the Exceptional Circumstances Panel relating to funding from the Community Exceptional Circumstances budget for medication, to be used in the community, in circumstances where the provision of a funded community medication is appropriate, but funding from the Pharmaceutical Budget is not able to be provided through the Pharmaceutical Schedule.

“**Community Pharmaceutical**” means a Pharmaceutical listed in Sections A to G of the Pharmaceutical Schedule that is subsidised by the Funder from the Pharmaceutical Budget for use in the community.

“**Contract Manufacturer**” means a manufacturer or a supplier that is a party to a contract with the relevant DHB Hospital to compound Hospital Pharmaceuticals, on request from that DHB Hospital.

“**Designated Delivery Point**” means at a DHB Hospital’s discretion:

- (a) a delivery point agreed between a pharmaceutical supplier and the relevant DHB Hospital, to which delivery point that pharmaceutical supplier must supply the Pharmaceutical directly at the Price; and/or
- (b) any delivery point designated by the relevant DHB Hospital or PHARMAC, such delivery point being within 30 km of the relevant pharmaceutical supplier’s national distribution centre.

“**DHB**” means an organisation established as a District Health Board by or under Section 19 of the Act.

“**DHB Hospital**” means a DHB, including its hospital or associated provider unit that the DHB purchases Hospital Pharmaceuticals for.

“**Discretionary Community Supply Pharmaceuticals**” means the list of Pharmaceuticals set out in Section H Part IV of the Schedule, which may be funded by a DHB Hospital from its own budget for use in the community.

“**DV Limit**” means, for a particular Hospital Pharmaceutical with HSS, the National DV Limit or the Individual DV Limit.

“**DV Pharmaceutical**” means a discretionary variance Pharmaceutical, that does not have HSS and which:

- (a) is either listed in Section H Part II of the Schedule as being a DV Pharmaceutical in association with the relevant Hospital Pharmaceutical with HSS; or
- (b) is the same chemical entity, at the same strength, and in the same or a similar presentation or form, as the relevant Hospital Pharmaceutical with HSS, but which is not yet listed as being a DV Pharmaceutical.

“**Exceptional Circumstances Panel**” means the panel of clinicians, appointed by the PHARMAC Board, that is responsible for administering policies in relation to Community Exceptional Circumstances and Hospital Exceptional Circumstances.

“**Funder**” means the body or bodies responsible, pursuant to the Act, for the funding of Pharmaceuticals listed on the Schedule (which may be one or more DHBs and/or the Ministry of Health) and their successors.

“**GST**” means goods and services tax under the Goods and Services Tax Act 1985.

“**Hospital Exceptional Circumstances**” means the policies and criteria administered by the Exceptional Circumstances Panel relating to the ability to fund, from a DHB Hospital’s own budget, pharmaceuticals for use in the community by a specific patient where a subsidy is not available from the Pharmaceutical Budget or under Community Exceptional Circumstances.

“**Hospital Pharmaceuticals**” means National Contract Pharmaceuticals, DV Pharmaceuticals, Discretionary Community Supply Pharmaceuticals and Assessed Pharmaceuticals.

“**HSS**” means hospital supply status, the status of being the brand of the relevant Hospital Pharmaceutical listed in Section H Part II as HSS, that DHBs are obliged to purchase subject to any DV Limit for that Hospital Pharmaceutical for the period of hospital supply, as awarded under an agreement between PHARMAC and the relevant pharmaceutical supplier.

“**Individual DV Limit**” means, for a particular Hospital Pharmaceutical with HSS and a particular DHB Hospital, the discretionary variance limit, being the specified percentage of that DHB Hospital’s Total Market Volume up to which that DHB Hospital may purchase DV Pharmaceuticals of that Hospital Pharmaceutical.

“**National Contract Pharmaceutical**” means a Hospital Pharmaceutical for which PHARMAC has negotiated a national contract and the Price.

“**National DV Limit**” means, for a particular Hospital Pharmaceutical with HSS, the discretionary variance limit, being the specified percentage of the Total Market Volume up to which all DHB Hospitals may collectively purchase DV Pharmaceuticals of that Hospital Pharmaceutical.

“**Outpatient**”, in relation to a Community Pharmaceutical, means a person who, as part of treatment at a hospital or other institution under the control of a DHB, is prescribed the Community Pharmaceutical for consumption or use in the person’s home.

“**PHARMAC**” means the Pharmaceutical Management Agency established by Section 46 of the Act (PHARMAC).

“**Pharmacode**” means the six or seven digit identifier assigned to a Pharmaceutical and notified to a pharmaceutical supplier by the Pharmacy Guild.

“**Pharmaceutical**” means a medicine, therapeutic medical device, or related product or related thing listed in Sections B to H of the Schedule.

“**Pharmaceutical Budget**” means the pharmaceutical budget set for PHARMAC by the Crown for the subsidised supply of Community Pharmaceuticals.

“**Pharmaceutical Cancer Treatments**” means Pharmaceutical for the treatment of cancer, listed in Sections A to G of the Schedule and identified therein as a “PCT” or “PCT only” Pharmaceutical that DHBs must fund, from their own budgets, for use in their hospitals, and/or in association with Outpatient services provided in their DHB Hospitals, in relation to the treatment of cancers.

“**Price**” means the standard national price, and, unless agreed otherwise between PHARMAC and the pharmaceutical supplier, includes any costs associated with the supply of a National Contract Pharmaceutical listed in Section H Part II of the Pharmaceutical Schedule to, at a DHB Hospital’s discretion, any Designated Delivery Point, or to a Contract Manufacturer (expressly for the purpose of compounding).

“**Schedule**” means this Pharmaceutical Schedule and all its sections and appendices.

“**Section B**” of this Pharmaceutical Schedule means the list of Community Pharmaceuticals eligible for Subsidies included in the Schedule.

“**Section C**” of this Pharmaceutical Schedule means the list of community extemporaneously compounded preparations and galenicals eligible for Subsidies included in the Schedule.

“**Section D**” of this Pharmaceutical Schedule means the list of community special foods eligible for Subsidies included in the Schedule.

“**Section E Part I**” of this Pharmaceutical Schedule means the list of Community Pharmaceuticals eligible for Subsidies and available on a Practitioner’s Supply Order or a Wholesale Supply Order included in the Schedule.

“**Section E Part II**” of this Pharmaceutical Schedule means the list of remote areas for the purpose of community Practitioner’s Supply Orders included in the Schedule.

“**Section F Part I**” of this Pharmaceutical Schedule means the part of Section F relating to the exemption from dispensing in Monthly Lots, and requirement to dispense in 90 Day Lots, in respect of the Community Pharmaceuticals referred to in this part of Section F;

“**Section F Part II**” of this Pharmaceutical Schedule means the part of Section F relating to the exemption from dispensing in Monthly Lots in respect of the Community Pharmaceuticals referred to in this part of Section F;

“**Section G**” of this Pharmaceutical Schedule means the list of Community Pharmaceuticals eligible for reimbursement of safety Cap.

“**Section H**” of this Pharmaceutical Schedule means the general rules for Hospital Pharmaceuticals and the lists of National Contract Pharmaceuticals and any associated DV Pharmaceuticals, of Discretionary Community Supply Pharmaceuticals and Assessed Pharmaceuticals included in Section H of the Schedule.

“**Section H Part I**” of this Pharmaceutical Schedule means the general rules for Hospital Pharmaceuticals.

“**Section H Part II**” of this Pharmaceutical Schedule means the list of National Contract Pharmaceuticals, the relevant Price, an indication of whether the Pharmaceutical has HSS and any associated DV Pharmaceuticals and DV Limit.

“**Section H Part III**” of this Pharmaceutical Schedule means the list of Assessed Pharmaceuticals.

“**Section H Part IV**” of this Pharmaceutical Schedule means the list of Discretionary Community Supply Pharmaceuticals.

“**Total Market Volume**” means, for a particular Hospital Pharmaceutical with HSS in any given period, in accordance with the data available to PHARMAC, the sum of:

- a) the total number of Units of the relevant Hospital Pharmaceutical with HSS purchased by all DHB Hospitals, or by a particular DHB Hospital in the case of the Individual DV Limit; and
- b) the total number of Units of all the relevant DV Pharmaceuticals, listed in Section H Part II in association with that Pharmaceutical, purchased by all DHB Hospitals, or by a particular DHB Hospital in the case of the Individual DV Limit.

“**Unit**” means an individual unit of a Pharmaceutical (e.g. tablet, 1 ml of an oral liquid, amp, syringe).

“**Unapproved Indication**” means, for a Pharmaceutical, an indication for which it is not approved under the Medicines Act 1981.

1.2 In addition to the above interpretations and definitions, unless the content requires otherwise, a reference in the Schedule to:

- (a) the singular includes the plural; and
- (b) any legislation includes a modification and re-enactment of, legislation enacted in substitution for, and a regulation, Order in Council, and other instrument from time to time issued or made under, that legislation, where that legislation, regulation, Order in Council or other instrument has an effect on the prescribing, dispensing or subsidising of Pharmaceuticals.

## **2. Current Hospital Pharmaceutical Contracts**

2.1 A DHB Hospital may enter into a contract for the purchase of any Pharmaceutical that is not a National Contract Pharmaceutical, provided that such contract:

- (a) does not oblige the relevant DHB Hospital to purchase a volume of that Pharmaceutical, if that Pharmaceutical is a DV Pharmaceutical, that is greater than the relevant DV Limit;
- (b) enables PHARMAC to access and use future price and volume data in respect of that Pharmaceutical; and
- (c) enables the relevant DHB Hospital to terminate the contract or relevant parts of the contract in order to give full effect to the national contract on 3 months’ written notice to the pharmaceutical supplier.

2.2 From the day after a DHB Hospital’s current supply contract for a chemical entity that is a National Contract Pharmaceutical expires, that DHB Hospital is to purchase the relevant National Contract Pharmaceutical listed in Section H Part II at the Price, and is to comply with the DV Limits for the National Contract Pharmaceutical where it has HSS.

2.3 Following written notification from PHARMAC that a Pharmaceutical is a National Contract Pharmaceutical, either through Section H updates or otherwise, DHB Hospitals are to take any steps available to them to terminate current contracts, and are not to enter into any new contracts or extend the period of any current contracts, for the supply of that National Contract Pharmaceutical listed in Section H Part II or the relevant chemical entity, unless PHARMAC expressly notifies otherwise.

### **3. National Contract Pharmaceutical Price**

- 3.1 DHB Hospitals must take all necessary steps to enable any contracts between PHARMAC and a pharmaceutical supplier in relation to National Contract Pharmaceuticals to be given full effect.
- 3.2 National Contract Pharmaceuticals that can be purchased by DHBs at the relevant Price, as agreed between PHARMAC and the relevant pharmaceutical supplier, are hereby deemed to include every medicine, therapeutic medical device, or related product or related thing listed in Section H Part II of the Schedule except DV Pharmaceuticals.
- 3.3 A National Contract Pharmaceutical is to be made available by the relevant pharmaceutical supplier for purchase at the relevant Price by any or all of the following:
  - a) DHB Hospitals at Designated Delivery Points; and/or
  - b) Contract Manufacturers (expressly for the purpose of compounding).

### **4. Hospital Supply Status (HSS)**

- 4.1 The DV Limit for any National Contract Pharmaceutical, which has HSS is set out beside the listing of the relevant National Contract Pharmaceutical in Section H Part II of the Schedule and may be amended from time to time.
  - 4.2 If a National Contract Pharmaceutical is listed in Section H Part II as having HSS, DHB Hospitals:
    - a) are expected to use up any existing stocks of DV Pharmaceuticals during the First Transition Period;
    - b) must not purchase DV Pharmaceuticals in volumes exceeding their usual requirements, or in volumes exceeding those which they reasonably expect to use, within the First Transition Period; and
    - c) must purchase the Hospital Pharmaceutical with HSS except:
      - i) to the extent that the DHB Hospital may use its discretion to purchase a DV Pharmaceutical within the DV Limit, provided that (subject to subclause (iii) below) the DV Limit has not been exceeded nationally;
      - ii) if the pharmaceutical supplier fails to supply that Hospital Pharmaceutical, in which case the relevant DHB Hospital does not have to comply with the DV Limit for that Hospital Pharmaceutical during that period of non-supply (and any such month(s) included in a period of non-supply will be excluded in any review of the DV Limit in accordance with clause 4.3 below);
      - iii) that where the DV Limit has been exceeded nationally, the DHB Hospital may negotiate with the pharmaceutical supplier who supplies the National Contract Pharmaceutical with HSS for written permission to vary the application of that DHB Hospital's Individual DV Limit for any patient whose exceptional needs require a DV Pharmaceutical.
  - 4.3 PHARMAC may, in its discretion, for any period or part period:
    - a) review usage by DHB Hospitals of the National Contract Pharmaceutical and DV Pharmaceuticals to determine whether the DV Limit has been exceeded; and
    - b) audit compliance by DHBs with the DV Limits and related requirements.
  - 4.4 PHARMAC will address any issues of non-compliance by any individual DHB with a DV Limit by:
    - a) obtaining the relevant DHB's assurance that it will comply with the DV Limit for that National Contract Pharmaceutical with HSS in the remainder of the applicable period and any subsequent periods; and
    - b) informing the relevant supplier of the HSS Pharmaceutical of any individual DHB's non-compliance with the DV Limit for that HSS Pharmaceutical.
  - 4.5 In addition to the steps taken by PHARMAC under clause 4.4 above to address any issues of non-compliance by any individual DHB with a DV Limit, the relevant pharmaceutical supplier may require, in its discretion, financial compensation from the relevant DHB
    - a) an amount representing its contribution towards exceeding the DV Limit (where PHARMAC is able to quantify this based on the information available to it); or
    - b) the sum of \$1,000 or \$5,000 (depending on the terms of the applicable national contract applying to the HSS Pharmaceutical),whichever is the greater as between sub-paragraphs (a) and (b) within the number of business days specified in the notice requiring such payment to be made.
-

- 4.6 The relevant DV Pharmaceuticals for any National Contract Pharmaceutical with HSS are listed in Schedule H Part II of the Schedule alongside that National Contract Pharmaceutical with HSS and may be amended from time to time. For the purposes of assessing a DHB Hospital's compliance with the DV Limit, if a Pharmaceutical has been added to be, or removed from being, a DV Pharmaceutical during the period that is being assessed PHARMAC is only to count the amount of those Pharmaceuticals that were purchased during the portion of the applicable period in which that Pharmaceutical was a DV Pharmaceutical.

## **5. Collection of rebates and payment of financial compensation**

- 5.1 Following the receipt of any rebates from a pharmaceutical supplier in respect of a particular Hospital Pharmaceutical, PHARMAC will notify each relevant DHB and DHB Hospital of the amount of the rebate owing to it, being a portion of the total rebate determined by PHARMAC on the basis of that DHB Hospital's usage of that Hospital Pharmaceutical, where this is able to be determined. Where data to determine individual DHB Hospitals' usage is not available, PHARMAC will apportion rebates on the basis of an alternative method agreed between the relevant DHBs and PHARMAC.
- 5.2 PHARMAC will pay each DHB Hospital the rebate amounts (if any) owing to it, no less frequently than once each calendar quarter in respect of rebates received quarterly (or more often).

## **6. Price and Volume Data**

- 6.1 DHB Hospitals are to provide to PHARMAC, on a monthly basis in accordance with PHARMAC's requirements, any volume data and, unless it would result in a breach of an existing contract, price data held by those DHB Hospitals in respect of any Hospital Pharmaceuticals listed in Section H of the Schedule.
- 6.2 All price and volume data provided to PHARMAC under clause 6.1 above should identify the relevant Hospital Pharmaceutical by using a Pharmacode or some other unique numerical identifier, and the date (month and year) on which the DHB Hospital incurred a cost for the purchase of that Pharmaceutical. Volume is to be measured in units (that being the smallest possible whole unit – e.g. a capsule, a vial, a millilitre etc).

## **7. Assessed Pharmaceuticals**

- 7.1 Assessed Pharmaceuticals are hereby deemed to include every medicine, therapeutic medical device, or related product or related thing listed in Section H Part III of the Schedule.
- 7.2 Any DHB Hospital or pharmaceutical supplier may apply to PHARMAC at any time to have a pharmaceutical assessed and to be placed on the Assessed Pharmaceutical list in Section H Part III of the Schedule.

## **8. Discretionary Community Supply Pharmaceuticals**

- 8.1 Discretionary Community Supply Pharmaceuticals are deemed to include every medicine, therapeutic medical device, or related product or related thing listed in Section H Part IV of the Schedule.
- 8.2 PHARMAC may, in its discretion, list any pharmaceutical that is not a Community Pharmaceutical as a Discretionary Community Supply Pharmaceutical, including a pharmaceutical that PHARMAC is made aware of by HPAC, the Exceptional Circumstances Panel, a DHB Hospital or relevant hospital personnel.
- 8.3 A DHB Hospital may use its discretion to purchase Discretionary Community Supply Pharmaceuticals for use in the community, provided that, if the patient being treated with a Discretionary Community Supply Pharmaceutical usually resides in a district other than that within the jurisdiction of the DHB initiating the treatment, then the DHB initiating the treatment must either agree to fund any on-going treatment required once the patient has returned to his/her usual DHB, or obtain written consent from the DHB or DHBs in which the patient will reside following the commencement of treatment.
- 8.4 The funding of a Discretionary Community Supply Pharmaceutical for use in the community will be sourced from the relevant DHB's own budget. For the avoidance of doubt, the Discretionary Community Supply Pharmaceutical is not a Community Pharmaceutical and funding is not available for Discretionary Community Supply Pharmaceuticals from the Pharmaceutical Budget.
- 8.5 Subject to rule 8.6, DHB Hospitals must not fund for use in the community, any pharmaceuticals that are not Discretionary Community Supply Pharmaceuticals unless they have been approved under Hospital Exceptional Circumstances.

- 8.6 DHB Hospitals may fund from their own budgets, any Pharmaceutical that is listed in Sections A-G of the Pharmaceutical Schedule without Hospital Exceptional Circumstances (HEC) approval provided that:
- (a) the condition for which that Pharmaceutical is supplied is consistent with any restrictions applying to that Pharmaceutical in Section A-G of the Pharmaceutical Schedule; and
  - (b) the quantity supplied does not exceed that sufficient for up to 5 days treatment, or one original pack, where inappropriate to provide less.

## **9. Pharmaceutical Cancer Treatments**

- 9.1 DHBs are obliged to fund Pharmaceutical Cancer Treatments in accordance with the October 2001 direction from the Minister of Health.
- 9.2 The list of Pharmaceutical Cancer Treatments may be amended from time to time. Additions and/or amendments to the list require the approval of the PHARMAC Board.
- 9.3 Pharmaceutical Cancer Treatments may be used in combination with each other, including where such combinations result in admixtures or dilutions that differ from those specified.
- 9.4 DHBs must not fund Pharmaceuticals for the treatment of cancer or Pharmaceutical Cancer Treatments for indications related to the treatment of cancer, if they are not listed in Sections A to G of the Pharmaceutical Schedule, unless the unlisted pharmaceutical:
- (a) has Cancer Exceptional Circumstances approval; or
  - (b) has Community Exceptional Circumstances or Hospital Exceptional Circumstances approval; or
  - (c) is being used as part of a *bona fide* clinical trial which has Ethics Committee approval; or
  - (d) is being used and funded as part of a paediatric oncology service; or
  - (e) was being used to treat the patient in question prior to 1 July 2005.
- 9.5 Some indications for Pharmaceutical Cancer Treatments listed in the Schedule are Unapproved Indications. Some of these formed part of the October 2001 direction from the Minister of Health as to pharmaceuticals and indications for which DHBs must provide funding. As far as reasonably practicable, these Unapproved Indications are marked in the Schedule. However, PHARMAC makes no representation and gives no guarantee as to the accuracy of this information. Practitioners prescribing Pharmaceutical Cancer Treatments for such Unapproved Indications should:
- (a) be aware of and comply with their obligations under sections 25 and 29 of the Medicines Act 1981, as applicable, and otherwise under that Act and the Medicines Regulations 1984;
  - (b) be aware of and comply with their obligations under the Health and Disability Commissioner's Code of Consumer Rights, including the requirement to obtain informed consent from the patient (PHARMAC recommends that Practitioners obtain written consent); and
  - (c) exercise their own skill, judgment, expertise and discretion, and make their own prescribing decisions with respect to the use of an unapproved Pharmaceutical Cancer Treatment or a Pharmaceutical Cancer Treatment for an Unapproved Indication.
- 9.6 Applications to add pharmaceuticals, and add or amend indications for Pharmaceutical Cancer Treatments, may be made in writing by pharmaceutical suppliers and/or clinicians to PHARMAC. Applications should follow PHARMAC's *Guidelines for Submissions to PTAC for New Chemical Entity Pharmaceuticals and Recommended methods to derive clinical inputs for proposals to PHARMAC*, copies of which are available from PHARMAC or PHARMAC's website.
- 9.7 Applications made under clause 9.6 must be assessed by HPAC, PHARMAC, PTAC and/or relevant subcommittees of PTAC.

## **10. Practitioners prescribing unapproved Pharmaceuticals**

Practitioners should, where possible, prescribe Pharmaceuticals that are approved under the Medicines Act 1981. However, the access criteria under which a Pharmaceutical is listed on the Pharmaceutical Schedule may:

- (a) in some case, explicitly permit Government funded access to a Pharmaceutical that is not approved under the Medicines Act 1981 or for an Unapproved Indication; or
- (b) not explicitly preclude Government funded access to a Pharmaceutical when it is used for an Unapproved Indication.

Accordingly, if Practitioners are planning on prescribing an unapproved Pharmaceutical or a Pharmaceutical for an Unapproved Indication, Practitioners should:

- (a) be aware of and comply with their obligations under sections 25 and 29 of the Medicines Act 1981, as applicable, and otherwise under that Act and the Medicines Regulations 1984;
- (b) be aware of and comply with their obligations under the Health and Disability Commissioner's Code of Consumer Rights, including the requirement to obtain informed consent from the patient (PHARMAC recommends that Practitioners obtain written consent); and
- (c) exercise their own skill, judgment, expertise and discretion, and make their own prescribing decisions with respect to the use of an unapproved Pharmaceutical or a Pharmaceutical for an Unapproved Indication.

Practitioners should be aware that simply by listing a Pharmaceutical on the Pharmaceutical Schedule PHARMAC makes no representations about whether that Pharmaceutical has any form of approval or consent under, or whether the supply or use of the Pharmaceutical otherwise complies with, the Medicines Act 1981. Further, the Pharmaceutical Schedule does not constitute an advertisement, advertising material or a medical advertisement as defined in the Medicines Act or otherwise.

## Part II

**Hospital Supply Status Products – cumulative to November 2008**

<b>Generic Name</b>	<b>Presentation</b>	<b>Brand Name</b>	<b>Expiry Date*</b>
Aciclovir	Tab dispersible 200 mg	Lovir	2009
	Tab dispersible 400 mg	Lovir	
	Tab dispersible 800 mg	Lovir	
Alprostadil	Inj 0.5 mg per ml, 1 ml	Prostin VR	2009
Amikacin sulphate	Inj 5 mg per ml, 5 ml	Biomed	2009
	Inj 250 mg per ml, 2 ml	Amikin	
Amantadine hydrochloride	Cap 100 mg	Symmetrel	2011
Amoxicillin	Cap 250 mg & 500 mg	Apo-Amoxi	2010
Apomorphine hydrochloride	Inj 10 mg per ml, 1 ml	Mayne	2009
Atenolol	Tab 50 mg & 100 mg	Pacific Atenolol	2009
Atropine sulphate	Inj 600 µg, 1 ml	AstraZeneca	2009
	Inj 1200 µg, 1 ml	AstraZeneca	
Azithromycin	Tab 500 mg	Arrow-Azithromycin	2009
Beclomethasone dipropionate	Metered aqueous nasal spray, 50 µg per dose	Alanase	2009
	Metered aqueous nasal spray, 100 µg per dose	Alanase	
Betamethasone valerate	Scalp app 0.1%	Beta Scalp	2009
Bezafibrate	Tab long-acting 400 mg	Bezalip Retard	2009
Bisacodyl	Tab 5 mg	Lax-Tabs	2010

	Inj 100 mg per ml, 10 ml	Uromitexan	
Metformin hydrochloride	Tab 500 mg & 850 mg	Arrow-Metformin	2009
Methadone hydrochloride	Tab 5 mg	Methatabs	2010
Methotrexate	Inj 100 mg per ml, 10 ml	Methotrexate Ebewe	2011
	Inj 100 mg per ml, 50 ml		
	Tab 2.5 mg & 10 mg	Methoblastin	2009
Methylphenidate hydrochloride	Tab 5 mg, 10 mg & 20 mg	Rubifen	2009
	Tab long-acting 20 mg	Rubifen SR	
Methylprednisolone	Tab 4 mg & 100 mg	Medrol	2009
Methylprednisolone aceponate	Crn 0.1% & Oint 0.1%	Advantan	2009

\*Expiry date of the Hospital Supply Status period is 30 June of the year indicated.

## Hospital Supply Status Products – cumulative to November 2008

Generic Name	Presentation	Brand Name	Expiry Date*
Methylprednisolone sodium succinate	Inj 40 mg per ml, 1 ml	Solu-Medrol	2009
	Inj 62.5 mg per ml, 1 ml	Solu-Medrol	
Metoprolol tartrate	Tab long-acting 200 mg	Slow-Lopresor	2009
Midazolam	Inj 1 mg per ml, 5 ml	Hypnovel	2009
	Inj 5 mg per ml, 3 ml	Hypnovel	
Mitozantrone	Inj 2 mg per ml, 5 ml & 10 ml	Mitozantrone Ebewe	2010
Morphine hydrochloride	Oral liq 1 mg per ml	RA-Morph	2009
	Oral liq 2 mg per ml	RA-Morph	
	Oral liq 5 mg per ml	RA-Morph	
	Oral liq 10 mg per ml	RA-Morph	
Morphine sulphate	Cap long-acting 10 mg, 30 mg, 60 mg, 100 mg and 200 mg	m-Eslon	2009
	Tab immediate release 10 mg & 20 mg	Sevredol	2009
	Inj 5 mg per ml, 1 ml	Mayne	2009
	Inj 15 mg per ml, 1 ml	Mayne	
Morphine tartrate	Inj 80 mg per ml, 5 ml	Mayne	2009
Nadolol	Tab 40 mg & 80 mg	Apo-Nadolol	2010
Naltrexone hydrochloride	Tab 50 mg	ReVia	2010
Naproxen sodium	Tab 275 mg	Sonaflam	2010
Neostigmine methylsulphate	Inj 2.5 mg per ml, 1 ml	AstraZeneca	2010
Nevirapine	Oral suspension 10 mg per ml	Viramune Suspension	2009
Nifedipine	Tab long-acting 20 mg	Nyefax Retard	2009
Nystatin	Cap 500,000 u	Nilstat	2010
	Tab 500,000 u	Nilstat	
Ondansetron hydrochloride	Tab 4 mg & 8 mg	Zofran	2010
	Tab disp 4 mg & 8 mg	Zofran Zydys	
Oxybutynin	Oral liq 5 mg per 5 ml	Apo-Oxybutynin	2010
	Tab 5 mg	Apo-Oxybutynin	
Oxycodone hydrochloride	Inj 10 mg per ml, 1 ml	OxyNorm	2010
	Inj 10 mg per ml, 2 ml	OxyNorm	
	Oral liq 5 mg per 5 ml	OxyNorm	
Oxytocin	Inj 5 iu per ml, 1 ml	Syntocinon	2009
	Inj 10 iu per ml, 1 ml	Syntocinon	
Oxytocin with ergometrine maleate	Inj 5 iu with ergometrine maleate 500 µg per ml, 1 ml	Syntometrine	2009
Paclitaxel	Inj 30 mg	Paclitaxel Ebewe	2011
	Inj 100 mg	Paclitaxel Ebewe	
	Inj 150 mg	Paclitaxel Ebewe	
	Inj 300 mg	Paclitaxel Ebewe	
	Inj 600 mg	Paclitaxel Ebewe	
Pancuronium bromide	Inj 2 mg per ml, 2 ml	AstraZeneca	2009
Pantoprazole	Tab 20 mg & 40 mg	Dr Reddy's Pantoprazole	2010
Paracetamol	Suppos 25 mg & 50 mg	Biomed	2009
Paroxetine hydrochloride	Tab 20 mg	Loxamine	2010
Pentastarch plasma expander	Inf 6%, 500 ml bag	StarQuin 200 6%	2009
Perhexiline maleate	Tab 100 mg	Pexsig	2009

## Hospital Supply Status Products – cumulative to November 2008

Generic Name	Presentation	Brand Name	Expiry Date*
Phenoxyethylpenicillin (Penicillin V)	Cap potassium salt 250 mg & 500 mg	Cilicaine VK	2010
	Grans for oral liq 125 mg per 5 ml	AFT	
	Grans for oral liq 250 mg per 5 ml	AFT	
Potassium chloride	Tab long-acting 600 mg	Span-K	2009
Prazosin hydrochloride	Tab 1 mg, 2 mg & 5 mg	Apo-Prazo	2010
Prilocaine hydrochloride	Inj 0.5%, 50 ml	Citanest	2010
	Inj 2%, 5 ml	Citanest	
Propofol	Inj 1%, 20 ml	Diprivan	2009
	Inj 1%, 50 ml	Diprivan	
	Inj 1%, 100 ml	Diprivan	
	Inj 1%, 50 ml prefilled syringe	Diprivan	
	Inj 2%, 50 ml prefilled syringe	Diprivan	
Quinine sulphate	Tab 200 mg	Q 200	2009
	Tab 300 mg	Q 300	
Ranitidine hydrochloride	Oral liq 150 mg per 10 ml	Peptisoothe	2010
Reteplase	Inj 10 iu vial	Rapilysin	2009
Rifabutin	Cap 150 mg	Mycobutin	2010
Rituximab	Inj 100 mg per 10 ml vial	Mabthera	2009
	Inj 500 mg per 50 ml vial	Mabthera	
Ropivacaine hydrochloride	Inj 2 mg per ml, 10 ml	Naropin	2010
	Inj 2 mg per ml, 20 ml	Naropin	
	Inf 2 mg per ml, 100 ml	Naropin	
	Inf 2 mg per ml, 200 ml	Naropin	
	Inj 7.5 mg per ml, 10 ml	Naropin	
	Inj 7.5 mg per ml, 20 ml	Naropin	
	Inj 10 mg per ml, 10 ml	Naropin	
	Inj 10 mg per ml, 20 ml	Naropin	
Ropivacaine hydrochloride with fentanyl	Inf 2 mg per ml with 2 µg of fentanyl per ml, 100 ml	Naropin	2010
	Inf 2 mg per ml with 2 µg of fentanyl per ml, 200 ml	Naropin	
Roxithromycin	Tab 150 mg & 300 mg	Arrow-Roxithromycin	2009
Salbutamol	Oral liq 2 mg per 5 ml	Salapin	2010
	Nebuliser soln, 1 mg per ml, 2.5 ml	Asthalin	2009
	Nebuliser soln, 2 mg per ml, 2.5 ml	Asthalin	
Sevoflurane	Liq 250 ml bottle	Abbott Sevorane	2009
Sodium chloride	Soln 0.9% for irrigation	Pfizer	2011
	Inj 0.9% per 5 ml & 10 ml	AstraZeneca	2009
	Inj 23.4%, 20 ml	Biomed	2009
Sodium citro-tartrate	Grans eff 4 g sachets	Ural	2010
Sodium hyaluronate	Inj 10 mg per ml, 0.35 ml; and inj 30 mg per ml with chondroitin sulphate 40 mg per ml, 0.4 ml	Duovisc	2009
	Inj 10 mg per ml, 0.5 ml; and inj 30 mg per ml with chondroitin sulphate 40 mg per ml, 0.55 ml	Duovisc	
	Ophthalmic inj 14 mg per ml	Healon GV	
	Ophthalmic soln 10 mg per ml	Healon Clear	

\*Expiry date of the Hospital Supply Status period is 30 June of the year indicated.

## Hospital Supply Status Products – cumulative to November 2008

Generic Name	Presentation	Brand Name	Expiry Date*
Suxamethonium chloride	Inj 50 mg per ml, 2 ml	AstraZeneca	2010
Syrup (pharmaceutical grade)	Liq	Midwest	2010
Tranexamic acid	Inj 100 mg per ml, 5 ml	Cyklokapron	2009
Triamcinolone acetonide with gramicidin, neomycin and nystatin	Ear drops 1 mg with nystatin 100,000 u, neomycin sulphate 2.5 mg and gramicidin 250 µg per g	Kenacomb	2009
Tropisetron	Cap 5 mg	Navoban	2009
Vincristine sulphate	Inj 1 mg per ml, 1 ml & 2 ml	Mayne	2009
Vinorelbine	Inj 10 mg per ml, 1 ml & 5 ml	Vinorelbine Ebewe	2009
Water	Purified for inj 5 ml, 10 ml & 20 ml	Multichem	2009
Zinc and castor oil	Oint	Orion	2009

## Assessments in 2006

Pharmaceutical	Comparator	Indication(s) Assessed	Status of Assessment	Cost/QALY Result	Value for Money?	Recommendations
Tenecteplase (Metalyse)	Other fibrin-specific thrombolytics (alteplase and reteplase)	ST-elevated myocardial infarction.	Draft version distributed in June 2006	N/A	The three fibrin-specific thrombolytics are similar in terms of efficacy and safety profiles. The costs of administration and monitoring of the two drugs are comparable.	Hospitals should contract for the fibrin-specific bolus thrombolytic (i.e. reteplase or tenecteplase) that can be purchased at least cost.
Bevacizumab (Avastin)	Standard treatment (verteporfin photodynamic therapy/ placebo)	Exudative age-related macular degeneration (ARMD).	Draft version distributed in September 2006.	Cost-saving to \$15,000/QALY.	Bevacizumab is cost-saving compared with verteporfin treatment.  Bevacizumab is also cost-saving compared with placebo in patients with poor initial visual acuity (VA) (<20/100 on the Snellen VA scale), and moderately cost-effective (cost/QALY \$10,000-\$15,000) in patients with better initial VA (20/40 on the Snellen VA scale).	Bevacizumab appears to be a relatively cost-effective treatment for exudative ARMD.  However, it should be noted that this is both an unapproved indication and route of administration for bevacizumab. Therefore any use of bevacizumab must comply with Section 25 of the Medicines Act 1981.

## Part III – Hospital Pharmaceuticals Assessed by PHARMAC

### Assessments in 2005

Pharmaceutical	Comparator	Indication(s) Assessed	Status of Assessment	Cost/QALY Result	Value for Money?	Recommendations
TNF-alpha inhibitors - etanercept (Enbrel), infliximab (Remicade) and adalimumab (Humira)	Methotrexate	Rheumatoid arthritis.	Final version distributed in February 2005.	\$191,000/QALY	At current price, not very good value for money.	Another TNF-inhibitor - adalimumab (Humira) is now funded for use in the community under Special Authority criteria. Hospital funding should be restricted to patients who would meet the Special Authority criteria for funding in the community to allow continuation of care upon discharge.
Risperidone microspheres (Risperdal Consta)	Partial adherence with oral olanzapine or oral risperidone	Last-line treatment of schizophrenia.	Final version distributed in September 2005.	\$9,000/QALY when used in non-compliant patients.	Cost-saving for patients on a Community Treatment Order.	Hospital funding should be restricted to patients who would meet the Special Authority criteria for funding in the community.
Tirofiban (Aggrastat)	Standard treatment	High-risk patients with acute coronary syndrome.	Distributed in June 2005.	Cost-minimisation indicated increase in cost of \$240 per patient.	Unlikely to be good value for money.	There is no evidence indicating that treatment with tirofiban is associated with reduced mortality. Absolute risk reductions in myocardial infarctions and refractory ischemic events are small, hence any hospital savings from reduced ischemic events are likely to be modest. The budgetary impact is likely to be significant.

## Part III – Hospital Pharmaceuticals Assessed by PHARMAC

To obtain a copy of the summary discussion documents, please contact either Rachel Grocott (04 916 7535; rachel.grocott@pharmac.govt.nz) or Ginny Priest (04 916 7568; ginni.priest@pharmac.govt.nz)

### Assessments in 2004

Pharmaceutical	Comparator	Indication(s) Assessed	Status of Assessment	Cost/QALY Result	Value for Money?	Recommendations
Celecoxib (Celebrex) and rofecoxib (Vioxx)	Conventional NSAIDs (diclofenac and naproxen)	Pain and inflammation in rheumatoid arthritis and osteoarthritis.	Final version distributed in February 2004.	\$60,000/QALY - \$220,000/QALY (depending on risk of GI ulcer).  No net health gains associated with celecoxib compared with diclofenac or rofecoxib compared with naproxen.	Poor value for money, even when targeted.	COX-2 inhibitors provide little (if any) additional clinical benefit over traditional NSAIDs, and at significantly higher cost. Therefore they do not represent good value for money compared with other pharmaceuticals that could be funded.
Moxifloxacin (Avelox) and gatifloxacin (Tequin)	Standard treatment	Community-acquired respiratory infections.	Final version distributed in April 2004.	N/A	Not good value for money for first-line empiric treatment of respiratory infections (costs approximately 12 times more than standard treatment, with no evidence of increased efficacy).	The new fluoroquinolones should be reserved for last-line treatment of severe community acquired pneumonia (where alternative agents have failed or are contraindicated).  Unnecessary use of the new fluoroquinolones in any circumstances other than those specified above may lead to enhanced antibiotic resistance, increased side-effects and increased costs.
Venlafaxine (Efexor)	Paroxetine	Treatment resistant depression.	Draft version distributed in June 2004.	\$4,000/QALY	Good value for money when targeted.	Treatment in hospital should be restricted to patients who will meet the community Special Authority criteria to allow continuation of treatment upon discharge.

### Assessments in 2003

Pharmaceutical	Comparator	Indication(s) Assessed	Status of Assessment	Cost/QALY Result	Value for Money?	Recommendations
Desflurane (Suprane)	Sevoflurane, isoflurane, and propofol	N/A	Final version distributed in November 2003.	N/A	For day surgery isoflurane is associated with lower costs and similar rates of post-operative nausea and vomiting (PONV) as sevoflurane and desflurane.  For major surgery the costs associated with the volatile anaesthetics are very similar (due to shorter post-operative care unit stays for patients administered sevoflurane or desflurane).	Each anaesthetic agent has specific clinical uses. However, in cases where more than one agent is suitable it is important that cost-effectiveness is considered.  Significant savings can also be made through the use of low gas flows. Compliance with low gas flows could be improved through regular gas flow audits.  Cost savings can also be obtained through the choice of the default vapouriser, availability of the different anaesthetics, regular drug expenditure audits, adherence to contract arrangements and prevention of DV limit breaches.
Drotracogin alfa activated (Xigris)	Placebo	Severe sepsis.	Final version distributed in March 2003.	\$35,000/QALY for patients with a high risk of death.  \$97,000/QALY for all patients with severe sepsis.  Less effective and more costly for patients with low risk of death.	May be reasonable value for money for patients with severe sepsis at high risk of death (APACHE II score $\geq 25$ ).	Drotracogin alfa (activated) represents reasonable value for money only if targeted to patients who are most likely to benefit.  Drotracogin alfa (activated) should not be used in patients with severe sepsis at low risk of death (APACHE II score $\leq 24$ ).
Gabapentin (Neurontin)	Placebo	Neuropathic pain for patients who are intolerant or unresponsive to alternative treatments.	Final version distributed in July 2003.	\$3,000-\$5,000/QALY for last-line treatment.	Good value for money if well targeted.	Hospital funding should be restricted to patients who would meet the Special Authority criteria for funding in the community to allow continuation of care upon discharge.
Infliximab (Remicade)	Usual care	Moderate to severe Crohn's disease for patients who are refractory to conventional treatment.	Final version distributed in November 2002.	\$53,000/QALY for single dose.  \$118,000/QALY for retreatment.  \$382,000/QALY for maintenance treatment.	May represent reasonable value for money if only a single-dose is administered.  Other options represent poor value for money.	It is recommended that only a single-dose of infliximab be administered to patients with severe first presentation of Crohn's disease. This may induce remission of disease, and allow patients to be stabilised on conventional therapies.  Clear treatment guidelines and criteria are recommended in order to avoid overuse or inappropriate use.

## Part III – Hospital Pharmaceuticals Assessed by PHARMAC

To obtain a copy of the summary discussion documents, please contact either Rachel Grocott (04 916 7535; rachel.grocott@pharmac.govt.nz) or Ginny Priest (04 916 7568; ginny.priest@pharmac.govt.nz)

### Assessments in 2003 continued

Pharmaceutical	Comparator	Indication(s) Assessed	Status of Assessment	Cost/QALY Result	Value for Money?	Recommendations
Linezolid (Zyvox)	Vancomycin	Methicillin-resistant staphylococcus aureus (MRSA) infections.	Final version distributed in July 2003.	Increase in cost of \$1,300 per patient compared to vancomycin.	Cost-saving if patients can be discharged on oral treatment within the first week of hospitalisation.	For patients who are vancomycin-resistant, unable to be administered intravenous treatment or have not shown any improvement with vancomycin treatment, linezolid may be a useful option.  Linezolid should not displace vancomycin as the standard antibiotic in the treatment of MRSA infections.  With the emergence of linezolid-resistant strains, it is important that hospitals have strict protocols for the use of linezolid and that susceptibility patterns are closely monitored.
Zoledronic acid (Zometa)	Pamidronate in cases of HCM and cancer metastases, alendronate for osteoporosis	Hypercalcaemia of malignancy (HCM), bone metastases in patients with breast cancer, osteolytic lesions in patients with multiple myeloma, and osteoporosis.	Update distributed in October 2003.	\$40,000/QALY for patients with HCM.  \$800,000/QALY for bone metastases and osteolytic lesions.	Most cost-effective if treatment is targeted to patients with HCM where the benefits are greatest.  Zoledronic acid represents very poor value for money when used for the treatment of bone metastases and osteolytic lesions.	Providing treatment is targeted to patients with HCM, zoledronic acid may be a useful option for hospitals that have waiting lists for bisphosphonate treatment (due to shorter administration time).  Insufficient evidence is available to evaluate the use of zoledronic acid for osteoporosis.
Voriconazole (Vfend)	Amphotericin B	Invasive Aspergillosis (IA).	Final version distributed in March 2004.	\$28,000/QALY - \$72,000/QALY (depending on improvement in survival).  \$22,000/QALY - \$46,000/QALY if only oral voriconazole used.	Oral voriconazole represents reasonable value for money.  For patients who are intolerant or unresponsive to amphotericin B, it is cost saving to use oral voriconazole instead of liposomal amphotericin or caspofungin.  If patients are unable to be administered an oral formulation, caspofungin is cheaper than intravenous voriconazole and lipid amphotericin.	Amphotericin B should remain the first-line treatment for suspected IA (unless renal impairment prevents usage).  Where amphotericin B is contraindicated or must be discontinued due to intolerance or ineffectiveness, caspofungin should be delivered whilst the patient remains an inpatient and requires intravenous treatment. When the patient is fit for discharge, oral voriconazole should be given as an alternative to IV caspofungin.

## Part IIIb – Preliminary Pharmaceutical Assessments

Preliminary pharmaceuticals assessments are undertaken for individual DHBs within shorter timeframes. These assessments are available for DHBs to access via a secure website: [www.pharmac.govt.nz/hpad](http://www.pharmac.govt.nz/hpad). To obtain a password for the website, please contact either Rachel Grocott (04 916 7535; [rachel.grocott@pharmac.govt.nz](mailto:rachel.grocott@pharmac.govt.nz)) or Ginny Priest (04 916 7568; [glinny.priest@pharmac.govt.nz](mailto:glinny.priest@pharmac.govt.nz))

<b>Pharmaceutical</b>	<b>Indication(s) Assessed</b>	<b>Date Completed</b>
Recombinant activated factor VIIa (Newoseven)	Non-haemophilic bleeding.	2005
Palizumab (Synagis)	Prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) in infants at high-risk of RSV disease.	2004
Levosimendan (Simdax)	Severe low-output heart failure.	2004

## **The Hospital Pharmaceutical Assessment Process (HPAP)**

The Hospital Pharmaceutical Assessment process (HPAP) involves concurrent (or as near as possible) assessments by PHARMAC of pharmaceuticals assessed by DHB Hospitals. It relies on pharmaceutical suppliers and DHBs submitting applications on new hospital pharmaceuticals to PHARMAC for national assessment.

The aims of the HPAP are to:

- facilitate the introduction of economic analysis into hospital assessments for pharmaceuticals;
- reduce duplication of work;
- promote dialogue between DHBs;
- facilitate review;
- improve the consistency and quality of assessments; and
- improve consistency of access to pharmaceuticals.

National assessment by PHARMAC does not confer any obligation on DHBs to fund or not to fund new pharmaceuticals. Hospitals may commence funding of the new pharmaceuticals prior to any PHARMAC review and may continue to do so irrespective of any recommendation PHARMAC may make following review.

## Part IV – Discretionary Community Supply Pharmaceuticals

<b>Chemical and presentation</b>	<b>Brand</b>	<b>Chemical and presentation</b>	<b>Brand</b>
ALBENDAZOLE Tab 200 mg	Albenza Zentel	CEFOTAXIME SODIUM Inj 500 mg Inj 1 g	
Indefinite supply to cover treatment of hydatid disease, strongyloidiasis, toxocarasis, ancylostomiasis, neurocysticercosis and schistosomiasis (where first line treatment has failed) until EC funding is approved (Section 29)		For any indication approved by the hospital service, with review at 6 weeks.	
AMIKACIN SULPHATE Inj 250 mg per ml, 2 ml		CEFOXITIN SODIUM Powder for injection 1 g	
For any indication approved by the hospital service, with review at 6 weeks		For any indication approved by the hospital service, with review at 6 weeks.	
AMOXYCILLIN WITH CLAVULANIC ACID Inj 600 mg, 500 mg with 100 mg clavulanic acid Inj 1.2 g, 1000 mg with 200 mg clavulanic acid		CEFTAZIDIME Inj 500 mg Inj 1 g Inj 2 g	
For any indication approved by the hospital service, with review at 6 weeks		For any indication approved by the hospital service, with review at 6 weeks.	
AMPHOTERICIN B Inj 50 mg Oral liq 100 mg per ml (non-liposomal only)		CEFTRIAXONE SODIUM Inj 1 g	
Up to 6 weeks supply for any appropriate indication		For any indication approved by the hospital service, with review at 6 weeks.	
AZTREONAM Inj 1 g		CEFUROXIME AXETIL Tab 250 mg Oral liq 125 mg per 5 ml	
For any indication approved by the hospital service, with review at 6 weeks.		Up to 2 weeks supply for any appropriate indication	
BENZATHINE PENICILLIN Inj 1.2 mega u per 2ml		CEFUROXIME SODIUM Inj 250 mg Inj 750 mg Inj 1.5 g	
For prophylaxis of endocarditis		For any indication approved by the hospital service, with review at 6 weeks.	
BENZYPENICILLIN SODIUM (PENICILLIN G) Inj 1 mega u		CHLORHEXIDINE Eye drops 0.02%	
For any indication approved by the hospital service, with review at 8 weeks.		For a period of 3 months for treatment of acanthamoeba keratitis.	
CEFAMANDOLE NAFATE Inj 500 mg Inj 1 g		CIPROFLOXACIN Oral liq 5% Oral liq 10%	
For any indication approved by the hospital service, with review at 8 weeks.		Up to 6 weeks supply for any appropriate indication	
CEFAZOLIN SODIUM Inj 500 mg Inj 1 g		CLOPIDOGREL Tab 75 mg	Plavix
For any indication approved by the hospital service, with review at 8 weeks.		Up to 4 weeks supply post stenting. Not to be funded for acute coronary syndrome or transient ischaemic attacks	
CEFEPIME HYDROCHLORIDE Inj 1 g, 15 ml Inj 2 g, 77 ml			
For any indication approved by the hospital service, with review at 6 weeks.			

<b>Chemical and presentation</b>	<b>Brand</b>	<b>Chemical and presentation</b>	<b>Brand</b>
CYCLOSPORIN		DEXTROSE	
Cap 25 mg	Gengraf	Inj 5%, 10 ml	
Cap 50 mg	Neoral	Where required for antibiotic treatment funded under DCS or HEC	
Cap 100 mg	Gengraf		
Oral liq 100 mg per ml	Neoral	ENOXAPARIN SODIUM	
For aplastic anaemia	Gengraf	Inj 20 mg per 0.2 ml	Clexane
	Neoral	Inj 40 mg per 0.4 ml	Clexane
	Gengraf	Inj 60 mg per 0.6 ml	Clexane

		Inj 100 mg per ml	Clexane
		Inj 120 mg per 0.8 ml	Clexane
		Inj 150 mg per ml	Clexane
DALTEPARIN SODIUM		For the treatment of venous thromboembolism (VTE) for a maximum of 14 days or until a stabilised therapeutic INR is established.	
Inj 2,500 IU per 0.2 ml	Fragmin	For a maximum treatment period from the time of diagnosis to 8 weeks post partum for a confirmed thromboembolic event during pregnancy.	
Inj 5,000 IU per 0.2 ml	Fragmin	For prophylaxis of thromboembolism for patients considered high risk after consultation with a specialist from diagnosis of pregnancy to 8 weeks post partum.	
Inj 7,500 IU per 0.75 ml	Fragmin	For a maximum treatment period from diagnosis of pregnancy to 8 weeks post partum for women normally maintained on long-term oral anticoagulation who are at very high risk of thromboembolism.	
Inj 10,000 IU per 0.4 ml	Fragmin	For the treatment for a maximum of 7 days pre and post operatively for patients on oral anticoagulants requiring surgical intervention in a public hospital or until an appropriate therapeutic INR level is reached.	
Inj 10,000 IU per 1 ml	Fragmin	For a maximum of 14 days treatment in high-risk patients post pelvic, colo-rectal and major orthopaedic surgery.	
Inj 12,500 IU per 0.5 ml	Fragmin	For a maximum of 7 days treatment for patients with an acute coronary syndrome (ACS) awaiting further hospital intervention.	
Inj 15,000 IU per 0.6 ml	Fragmin	For a maximum of 14 days treatment post cardioversion in non anticoagulated patients with atrial fibrillation or until appropriate therapeutic INR level is reached.	
Inj 18,000 IU per 0.72 ml	Fragmin	For treatment of malignancy - associated venous thromboembolism.	
For the treatment of venous thromboembolism (VTE) for a maximum of 14 days or until a stabilised therapeutic INR is established.		ERTAPENEM SODIUM	
For a maximum treatment period from the time of diagnosis to 8 weeks post partum for a confirmed thromboembolic event during pregnancy.		Inj 1 g	
For prophylaxis of thromboembolism for patients considered high risk after consultation with a specialist from diagnosis of pregnancy to 8 weeks post partum.		For any indication approved by the hospital service, with review at 6 weeks.	
For a maximum treatment period from diagnosis of pregnancy to 8 weeks post partum for women normally maintained on long-term oral anticoagulation who are at very high risk of thromboembolism.		FILGRASTIM	
For the treatment for a maximum of 7 days pre and post operatively for patients on oral anticoagulants requiring surgical intervention in a public hospital or until an appropriate therapeutic INR level is reached.		Inj 300 µg per 0.5 ml prefilled syringe	Neupogen
For a maximum of 14 days treatment in high-risk patients post pelvic, colo-rectal and major orthopaedic surgery.		Inj 300 µg per 1 ml vial	Neupogen
For a maximum of 7 days treatment for patients with an acute coronary syndrome (ACS) awaiting further hospital intervention.		Indefinite supply for any appropriate indication for the management of patients with cancer.	
For a maximum of 14 days treatment post cardioversion in non anticoagulated patients with atrial fibrillation or until appropriate therapeutic INR level is reached.			
For treatment of malignancy - associated venous thromboembolism.			
DEMECLOCYCLINE			
Cap 150 mg	Ledermycin		
Indefinite supply for SIADH (syndrome of inappropriate anti diuretic hormone) (Section 29)			

<b>Chemical and presentation</b>	<b>Brand</b>	<b>Chemical and presentation</b>	<b>Brand</b>
FLUCLOXACILLIN SODIUM Inj 250 mg Inj 500 mg Inj 1g For any indication approved by the hospital service, with review at 8 weeks.		LENOGRASTIM Inj 13.4 million iu vial Inj 33.6 million iu vial Indefinite supply for any appropriate indication for the management of patients with cancer.	Granocyte Granocyte
FLUCONAZOLE Inj 100 mg per 50 ml For any indication approved by the hospital service, with review at 6 weeks.		LIGNOCAINE Viscous solution 2% For patients with head, neck and oesophageal cancer for up to 9 weeks following radiation therapy.	
FORTIFIED EYE DROPS Up to 4 weeks supply of proprietary eyedrops fortified with any appropriate anti-infective agent for the treatment of severe corneal or eye surface infections		MEROPENEM Inj 500 mg Inj 1 g For any indication approved by the hospital service, with review at 6 weeks.	
FOSCARNET Inj 24 mg per ml IV soln Indefinite supply for any appropriate indication		METHOXSALEN Cap 10 mg Indefinite supply for PUVA – psoralen plus ultraviolet a (UVA) therapy for severe, disabling psoriasis prephototherapy.	Oxsoralen
GANCICLOVIR Inj 500 mg For prophylaxis and treatment of CMV-associated disease in immunocompromised patients and following organ transplant.	Cyreneve	MINOXIDIL Tab 2.5 mg Tab 5 mg Tab 10 mg Indefinite supply for the treatment of severe hypertension that is resistant to other anti-hypertensives or where alternatives are not tolerated (Section 29)	Loniten Loniten Loniten
GENTAMICIN SULPHATE Inj 40 mg per ml, 2 ml Indefinite supply for any indication approved by the hospital service.		MOLGRAMOSTIM Inj 300 µg Indefinite supply for any appropriate indication for the management of patients with cancer.	Leucomax
HEPARINISED SALINE Inj 10 iu per ml, 5 ml Inj 100 iu per ml, 5 ml For the maintenance of IV lines		NETILMICIN Inj 150 mg per 1.5 ml Up to 2 weeks supply for any appropriate indication (extension for up to 6 weeks supply for endocarditis should be applied for under Hospital EC)	
HYOSCINE (Scopolamine) Patches 1.5 mg Up to 6 months supply for symptom control in terminally ill patients	Scopoderm TTS	NIMODIPINE Tab 30mg Up to 21 days supply post sub-arachnoid haemorrhage	
IMIPENEM WITH CILASTATIN Inj 500 mg with cilastin 500 mg For any indication approved by the hospital service, with review at 6 weeks.		ONDANSETRON HYDROCHLORIDE Tab 4 mg Tab 8 mg Tab dispersible 4 mg Tab dispersible 8 mg For treatment of patients with hyperemesis gravidarum for the term of the pregnancy following failure of other antiemetic regimens.	Zofran Zofran Zofran Zydys Zofran Zydys
ITRACONAZOLE Oral liq 10 mg per ml Up to 3 months supply for use in liver transplant patients		IVERMECTIN Tab 6 mg Indefinite supply for the treatment of filaricides, cutaneous larva migrans (creeping eruption) and Strongyloidiasis (Section 29)	

Chemical and presentation	Brand	Chemical and presentation	Brand
PAMIDRONATE DISODIUM Inj 3 mg per ml, 10 ml	Pamisol Aredia	SODIUM CHLORIDE Tab 600 mg	Slow Sodium
Inj 6 mg per ml, 10 ml	Pamisol	Indefinite supply for salt wasting nephropathy (Section 29)	
Inj 9 mg per ml, 10 ml	Pamisol	Inj 0.9%	
For malignant hypercalcaemia, metastatic breast cancer – predominant lytic bone metastases, myeloma with lytic bone metastases, control of pain due to lytic bone metastases in addition to standard care (analgesics + radiotherapy), Gaucher disease with established bone disease.		Where required for injection of antibiotic treatment funded under DCS or HEC	
PENTAMIDINE Inj 300 mg		SPECIAL FOOD SUPPLEMENT Powder, sachet 74 g	Oral Impact
Indefinite supply for any appropriate indication		Three sachets per day for 5-7 days prior to major gastrointestinal or head or neck surgery.	
PHENINDIONE Tab 10 mg Tab 25 mg Tab 50 mg		SULPHADIAZINE Tab 500 mg (Section 29)	
Indefinite supply for warfarin resistance anti-coagulation therapy (Section 29)		For the treatment of toxoplasmosis in patients with HIV for a period of 3 months; For pregnant patients for the term of the pregnancy; For infants with congenital toxoplasmosis until 12 months of age.	
PIPERACILLIN SODIUM Inj 2 g Inj 4 g		TEICOPLANIN Inj 400 mg	
For any indication approved by the hospital service, with review at 6 weeks.		For any indication approved by the hospital service, with review at 6 weeks.	
PIPERACILLIN WITH TAZOBTAM Inj 4 g with tazobactam 500 mg		TICARCILLIN DISODIUM WITH CLAVULANIC ACID Inj 3 g with clavulanic acid 0.1 g	
For any indication approved by the hospital service, with review at 6 weeks.		For any indication approved by the hospital service, with review at 6 weeks.	
POLYHEXAMETHYLENE BIGUANIDE Eye drops 0.02%		TINZAPARIN SODIUM Inj 3,500 anti-Xa IU/0.35ml Inj 4,500 anti Xa IU/0.45ml Inj 10,000 anti Xa IU/0.5ml Inj 14,000 anti Xa IU/0.7ml Inj 18,000 anti Xa IU/0.9ml Inj 20,000 anti XaIU/ml, 2ml	Innohep Innohep Innohep Innohep Innohep Innohep
For a period of 3 months for treatment of acanthamoeba keratitis.		For the treatment of venous thromboembolism (VTE) for a maximum of 14 days or until a stabilised therapeutic INR is established.	
PRAZIQUANTEL Tab (s29) 500 mg	Cysticide	For a maximum treatment period from the time of diagnosis to 8 weeks post partum for a confirmed thromboembolic event during pregnancy.	
For the treatment of worm infestations (Section 29)		For prophylaxis of thromboembolism for patients considered high risk after consultation with a specialist from diagnosis of pregnancy to 8 weeks post partum.	
PRIMOQUIN Tab 2.5 mg Tab 5 mg Tab 7.5 mg		For a maximum treatment period from diagnosis of pregnancy to 8 weeks post partum for women normally maintained on long-term oral anticoagulation who are at very high risk of thromboembolism.	
Indefinite supply for any appropriate indication (Section 29)		For the treatment for a maximum of 7 days pre and post operatively for patients on oral anticoagulants requiring surgical intervention in a public hospital or until an appropriate therapeutic INR level is reached.	
PYRIMETHAMINE Tab 25 mg (Section 29)			
For the treatment of toxoplasmosis in patients with HIV for a period of 3 months; For pregnant patients for the term of the pregnancy; For infants with congenital toxoplasmosis until 12 months of age.

PHARMAC is the Government agency responsible for deciding which medicines are subsidised for New Zealanders. It manages spending on pharmaceuticals for the District Health Boards, and ensures that a comprehensive list of medicines (the Pharmaceutical Schedule) is subsidised for New Zealanders, and that the list of medicines continues to grow to meet the needs of patients.
